Trainee/ Junior Manual QA Engineer / Automation QA Engineer

I have already put some time into understanding the theoretical fundamentals, and tried my hand at creating test documentation. Now I want to expand my knowledge, and find a job in QA where I can grow as a professional in the direction of automation of quality assurance. I strive for self-development, persistent in finding solutions and achieving goals.

Hard Skills

Understanding of SDLC, theoretical knowledge of the overall software development process.

Good knowledge of fundamental test processes, testing types and techniques.

Ability to build and maintain test documentation (namely checklists, test cases, bug reports).

Basic knowledge of API testing.

Basic knowledge of OOP, C#, test automation for web UI

Development Tools

TestRail

Jira, Trello, Zenkit

Fiddler, Postman, Swagger

GitHub, GitLab

Visual Studio, Visual Studio Code

Jenkins

Programming Languages/ Technologies

Technical Documentation/ SRS

HTML/CSS (basics)

API REST

RDBMS: PostgreSQL, MySQL, SQLite

C# basics

Selenium Webdriver

Methodologies

Agile

SCRUM

Kanban

TDD

XP

Languages

Ukrainian - native

English - B2

Additional education

EPAM External Test Automation Laboratory 2022

EPAM External course Software Functional Testing 2022

LinkedIn Learning Courses

Software Testing - Base Course (Svyatoslav Kulikov)

Self-education on the basis of free online information.
